TBomb

TBomb is a free and open-source tool available on GitHub which is used to perform call and SMS bombing on the target phone number. This is the best tool for performing pranks on someone. This tool is written in python, so you must have python installed in your kali linux operating system.

This tool works with open-source intelligence APIs that's why this tool requires an internet connection to perform bombing. This tool doesn't take your phone number, you only have to enter the target phone number and the tool will do the rest of the work. You must ensure that you always install the latest version of TBomb from GitHub in order to not get stuck with the working of the tool.

Usecase: -

- **Testing:** TBomb can be used for legitimate purposes, such as testing the resilience of systems against bulk messaging and call attacks.
- **Ethics:** Misuse of TBomb for harassment or illegal activities is unethical and illegal. It is important to obtain explicit consent from the recipient before using such tools.
- **Legal Issues:** Unauthorized use of such tools can lead to legal consequences, including violations of telecommunications laws and potential criminal charges.

Practical: -

1. You can simply clone it from its official github repository.

```
┌──(root💀kali)-[/home/kali]
└─# git clone https://github.com/TheSpeedX/TBomb.git
Cloning into 'TBomb'...
remote: Enumerating objects: 622, done.
remote: Counting objects: 100% (209/209), done.
remote: Compressing objects: 100% (70/70), done.
remote: Total 622 (delta 168), reused 143 (delta 139), pack-reused 413
Receiving objects: 100% (622/622), 1.61 MiB | 3.33 MiB/s, done.
Resolving deltas: 100% (340/340), done.
```

2. After installation go to its repository.

```
┌──(root💀kali)-[/home/kali]
└─# cd TBomb
```

3. To run it use bash ./Tbomb.sh command.

4. Now it is ready to use. Press 1 for massage bombarding.

```
[ ✓ ] Version: 2.1.2
